Technical Skills:

Subject(s):

- ➤ Object Oriented Programming
- ➤ Database Management System

Language Skill(s):

- ➤ C
- ➤ Core Java(OOP)

Projects Undertaken:

Minor Project	Hospital Finder
Description	Hospital Finder is an app-based solution for the problems that common people face during the time of medical emergencies, people always face the problem in deciding which hospital they should visit based on their medical emergencies. This app will provide a list of hospitals based on available medical treatment, specialist doctors, medicine/blood availability, etc.
Tools & Technologies	**Data-Markup**: HTML,CSS **Front-End Scripting**: JavaScript **Back-End Technologies**: Adv. JAVA, MySQL
Responsibilities	✓ Gathered requirements and divided them into technical modules.

	✓ Worked on the Architectural Design of the project.
	✓ Worked on JDBC: Java Database Connectivity.
	✓ Performed Alpha Testing

Major Project	**Online Discussion Forum**
Description	Online forums can be used for many purposes, such as helping students to review material prior to an assignment or exam, engaging students in discussion of course material before coming to class and reflecting on material that they have read or worked with outside of class and help students to develop them. This website will also provide best study resources educational materials like e-books, pdfs, documents which will help in their studies.
